

UNDERSTAND PEST RISKS AND PROTECT YOUR BUSINESS

COMMON TRESPASSERS

FLIES

COCKROACHES

RODENTS

CAN QUICKLY INFEST YOUR FACILITY, WHEN LEFT UNATTENDED

Flies impact food safety and are known carriers of disease causing pathogens.

Before
Occasional Sightings

Cockroaches spread bacteria and are associated with dirty, unsanitary environments.

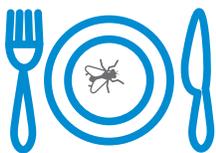

Today
An Infestation (1-6 weeks)

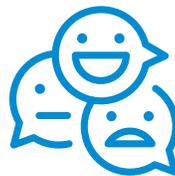

Rodents are known to spread disease. They damage reputations as well as food inventory & building structure.

NEGATIVELY IMPACTING CUSTOMER EXPERIENCE

THREATING FOOD SAFETY

DAMAGING YOUR BRAND & REPUTATION

INDICATING POOR SANITATION

CREATING A SIGNIFICANT FOOD SAFETY & PUBLIC HEALTH RISK
