Aniosyme X3

Detergent pre-disinfectant for instrumentation

Product characteristics

- Proved efficacy (DCP*) *Degreasing Cleaning Power
- Neutral pH: compatible with alloys
- Absence of chloride: non corrosive effect with materials
- Compatible with ultra-sonic process
- Clear liquid blue
- pH after dilution (0.5%) with tap water: approximately 7.5

Instructions for use

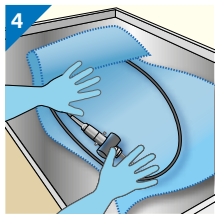

Concentrated solution. Prime the associated pump before first use. To be used in soaking at the required dilution, respecting the contact time.

Totally immerse the medical device. Keep the soaking bath covered during the contact time. Brush if visible soiling is present.

Thoroughly rinse treated medical devices with tap water to remove all traces of product and organic soiling.

Replace the solution as soon as it is visibly soiled and at least once per day to maintain the effectiveness of the product.

Microbiological properties

Claim/Conditions	Concentration	Contact time
Bactericidal* According to EN 13727 and EN 14561	0.5%	7 min
Yeasticidal* According to EN 13624 and EN 14562	0.5%	30 min
Active on enveloped viruses* According to EN 14476/EN 17111	0.5%	7 min

*=Dirty conditions

Packaging and ordering information

Product	Packaging unit	Order code
Aniosyme X3	12 x 1 L bottles	xxxxx
Aniosyme X3	4 x 5 L cans with 25 mL pump	xxxxx

Application area

Cleaning and disinfection of medical devices: surgical and medical instruments, heat-sensitive instruments and endoscopy equipment, before sterilisation.

Instructions for use

1. Concentrated solution. Prime the associated pump before first use. To be used in soaking at the required dilution, respecting the contact time.
2. Totally immerse the medical device. Keep the soaking bath covered during the contact time. Brush if visible soiling is present.
3. Thoroughly rinse treated medical devices with tap water to remove all traces of product and organic soiling.
4. Replace the solution as soon as it is visibly soiled and at least once per day to maintain the effectiveness of the product.

Ingredients

Quaternary ammonium propionate, Chlorhexidine digluconate, non-ionic surfactants, enzymatic complex (protease, lipase and amylase), perfume, colorant, excipients.

Storage

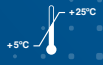

Dangerous – respect the precautions for use (drawn up according to the European rules in force regarding the classification and labelling of chemical products). Storage: from +5°C to +25°C.

Certificates

Medical device. Full antimicrobial activity for Aniosyme X3 is included in the scientific dossier, available on request.

Medical device use safely

Please read label and product information.

FOR PROFESSIONAL USE ONLY.
